

Course Descriptions

Each course has a four-digit number. The first digit identifies the course as either freshman level (1) or sophomore level (2). When the first digit is 0, the course is developmental and does not earn college-level credit. The second digit identifies the number of credit hours students earn upon completing the course. The final two digits establish the sequence in which courses are usually taken.

The information in parentheses at the end of each course description indicates the number of hours each week of lecture, laboratory, and other activity. For example, (3 lec/3 lab) indicates a course meets for three hours of lecture and three hours of laboratory each week. See [Course Numbers](#) for additional information on the Texas Common Course Numbering System and its benefits to students.
